### **Professional Profile**

I am a motivated and reliable professional currently undertaking a Level 2 Coding qualification, which I commenced on 15 December 2025 and expect to complete in March 2026. I am actively working towards transitioning into a career in coding, web development, and programming.

I bring strong transferable skills developed through business ownership, customer-facing roles, and manufacturing environments, including problem-solving, communication, attention to detail, and the ability to learn new systems quickly. Having managed a business website, customer communications, and operational processes, I have developed a practical understanding of digital platforms alongside a disciplined and professional work ethic.

I am now focused on building a solid technical foundation and gaining hands-on experience in software development, with the long-term aim of securing a junior or entry-level role in the technology sector.

### **Key Skills**

- Strong communication and customer service skills
- Experience managing and updating a business website
- Problem-solving and analytical thinking
- Ability to work independently and within a team
